

Field Tech Dashboard System — Developer Guidelines

A mobile-first Field Technician Dispatch and Ticket Management System designed for field technicians, dispatchers, operations teams, and administrators. Primary stack: - Google Sheets (database) - Google Apps Script (backend/API) - HTML/CSS/JavaScript (frontend) The system is designed for scalability and future migration to Firebase or SQL-based infrastructure.

Core Objectives

- Manage field service tickets
- Allow technicians to claim jobs
- Track job lifecycle
- Provide navigation assistance
- Store historical activity logs
- Support operational reporting
- Prepare for payout/payroll automation

User Roles

- Admin — Full system management access
- Dispatcher — Ticket coordination and monitoring
- Technician — Mobile-focused field operations

Ticket Lifecycle

- OPEN → IN PROGRESS → COMPLETED
- IN PROGRESS → CANCELLED

Main Dashboard Tabs

- OPEN — newly created/unassigned tickets
- IN PROGRESS — active technician jobs
- COMPLETED — resolved tickets
- CANCELLED — invalid or terminated tickets

Mobile UI Guidelines

- Mobile-first responsive layout
- Touch-friendly actions
- Minimal clutter
- Fast operational workflow
- 1–2 tap completion for critical actions

Ticket Card Required Fields

- Ticket Number
- Site Code
- Locality
- Address
- Priority
- Status
- Assigned Technician
- Opened Timestamp

Priority System

- HIGH — Red
- MEDIUM — Orange
- LOW — Green

Database Sheets

- SETTINGS
- USERS
- SITES
- TICKETS
- TICKET_HISTORY
- CLAIMS
- VISITS
- PAYOUTS
- CLIENTS

Required TICKETS Columns

- TICKET_ID
- SITE_ID
- SITE_CODE
- SITE_NAME
- LOCALITY
- ADDRESS
- LATITUDE
- LONGITUDE
- PRIORITY
- STATUS
- ASSIGNED_TO

- CONTACT_PERSON
- CONTACT_NUMBER
- DATE_OPENED
- DATE_CLAIMED
- DATE_COMPLETED
- DATE_CANCELLED
- CREATED_BY
- ISSUE_TYPE
- ISSUE_DETAILS
- SLA_HOURS
- LAST_UPDATED

Apps Script Backend Functions

- createTicket()
- claimJob()
- completeJob()
- cancelJob()
- getTickets()
- getTicketDetails()
- addHistory()
- getDashboardStats()

Scalability Roadmap

- GPS tracking
- Photo uploads
- Digital signatures
- Technician analytics
- Push notifications
- Automated SLA monitoring

Final Technical Direction

The system should resemble professional field dispatch and IT service management platforms focused on speed, operational clarity, technician efficiency, and accountability.
